a reader can redo the arithmetic. Mongolia runs a pay-as-you-go pension system into a demographic transition that will strain it within two decades. Four scenarios are costed on identical assumptions, and the model and its data sources are printed in full so a reader can redo the arithmetic. Mongolia runs a pay-as-you-go pension system into a demographic transition that will strain it within two decades. Four scenarios are costed on identical assumptions, and the model and its data sources are printed in full so a reader can redo the arithmetic.

Mongolia runs a pay-as-you-go pension system into a demographic transition that will strain it within two decades. Four scenarios are costed on identical assumptions, and the model and its data sources are printed in full so a reader can redo the arithmetic. Mongolia runs a pay-as-you-go pension system into a demographic transition that will strain it within two decades. Four scenarios are costed on identical assumptions, and the model and its data sources are printed in full so a reader can redo the arithmetic. Mongolia runs a pay-as-you-go pension system into a demographic transition that will strain it within two decades. Four scenarios are costed on identical assumptions, and the model and its data sources are printed in full so a reader can redo the arithmetic.

Mongolia runs a pay-as-you-go pension system into a demographic transition that will strain it within two decades. Four scenarios are costed on identical assumptions, and the model and its data sources are printed in full so a reader can redo the arithmetic. Mongolia runs a pay-as-you-go pension system into a demographic transition that will strain it within two decades. Four scenarios are costed on identical assumptions, and the model and its data sources are printed in full so a reader can redo the arithmetic. Mongolia runs a pay-as-you-go pension system

into a demographic transition that will strain it within two decades. Four scenarios are costed on identical assumptions, and the model and its data sources are printed in full so a reader can redo the arithmetic. Mongolia runs a pay-as-you-go pension system into a demographic transition that will strain it within two decades. Four scenarios are costed on identical assumptions, and the model and its data sources are printed in full so a reader can redo the arithmetic. Mongolia runs a pay-as-you-go pension system into a demographic transition that will strain it within two decades. Four scenarios are costed on identical assumptions, and the model and its data sources are printed in full so a reader can redo the arithmetic. Mongolia runs a pay-as-you-go pension system into a demographic transition that will strain it within two decades. Four scenarios are costed on identical assumptions, and the model and its data sources are printed in full so a reader can redo the arithmetic. Mongolia runs a pay-as-you-go pension system into a demographic transition that will strain it within two decades. Four scenarios are costed on identical assumptions, and the model and its data sources are printed in full so a reader can redo the arithmetic. Four scenarios are costed on identical assumptions, and the model and its data sources are printed in full so a reader can redo the arithmetic. Mongolia runs a pay-as-you-go pension system into a demographic transition that will strain it within two decades. Four scenarios are costed on identical assumptions, and the model and its data sources are printed in full so a reader can redo the arithmetic. Mongolia runs a pay-as-you-go pension system into a demographic transition that will strain it within two decades. Four

scenarios are costed on identical assumptions, and the model and its data sources are printed in full so a reader can redo the arithmetic. Mongolia runs a pay-as-you-go pension system into a demographic transition that will strain it within two decades. Four scenarios are costed on identical assumptions, and the model and its data sources are printed in full so a reader can redo the arithmetic. Mongolia runs a pay-as-you-go pension system into a demographic transition that will strain it within two decades. Four scenarios are costed on identical assumptions, and the model and its data sources are printed in full so a reader can redo the arithmetic.

Mongolia runs a pay-as-you-go pension system into a demographic transition that will strain it within two decades. Four scenarios are costed on identical assumptions, and the model and its data sources are printed in full so a reader can redo the arithmetic. Mongolia runs a pay-as-you-go pension system into a demographic transition that will strain it within two decades. Four scenarios are costed on identical assumptions, and the model and its data sources are printed in full so a reader can redo the arithmetic. Mongolia runs a pay-as-you-go pension system into a demographic transition that will strain it within two decades. Four scenarios are costed on identical assumptions, and the model and its data sources are printed in full so a reader can redo the arithmetic.

Mongolia runs a pay-as-you-go pension system into a demographic transition that will strain it within two decades. Four scenarios are costed on identical assumptions, and the model and its data sources are printed in full so a reader can redo the arithmetic. Mongolia runs a pay-as-you-go pension system into a demographic transition that will strain it within two decades. Four scenarios are costed on identical assumptions, and the model and its data

sources are printed in full so a reader can
redo the arithmetic. Mongolia runs a pay-as-you-go pension system
into a demographic transition that will strain it within
two decades. Four scenarios are costed on identical assumptions,

Mongolia runs a pay-as-you-go pension system into a demographic transition that will strain it within two decades. Four scenarios are costed on identical assumptions, and the model and its data sources are printed in full so a reader can redo the arithmetic. Mongolia runs a pay-as-you-go pension system into a demographic transition that will strain it within two decades. Four scenarios are costed on identical assumptions, and the model and its data sources are printed in full so a reader can redo the arithmetic. Mongolia runs a pay-as-you-go pension system into a demographic transition that will strain it within two decades. Four scenarios are costed on identical assumptions, and the model and its data sources are printed in full so a reader can redo the arithmetic.

Mongolia runs a pay-as-you-go pension system into a demographic transition that will strain it within two decades. Four scenarios are costed on identical assumptions, and the model and its data sources are printed in full so a reader can redo the arithmetic. Mongolia runs a pay-as-you-go pension system into a demographic transition that will strain it within two decades. Four scenarios are costed on identical assumptions, and the model and its data sources are printed in full so a reader can redo the arithmetic. Mongolia runs a pay-as-you-go pension system into a demographic transition that will strain it within two decades. Four scenarios are costed on identical assumptions, and the model and its data sources are printed in full so a reader can redo the arithmetic.

Mongolia runs a pay-as-you-go pension system into a demographic transition that will strain it within two decades. Four scenarios are costed on identical assumptions, and the model and its data sources are printed in full so a reader can redo the arithmetic. Mongolia runs a pay-as-you-go pension system into a demographic transition that will

strain it within two decades. Four scenarios are costed on identical assumptions, and the model and its data sources are printed in full so a reader can redo the arithmetic. Mongolia runs a pay-as-you-go pension system into a demographic transition that will strain it within two decades. Four scenarios are costed on identical assumptions, and the model and its data sources are printed in full so a reader can redo the arithmetic.

Mongolia runs a pay-as-you-go pension system into a demographic transition that will strain it within two decades. Four scenarios are costed on identical assumptions, and the model and its data sources are printed in full so a reader can redo the arithmetic. Mongolia runs a pay-as-you-go pension system into a demographic transition that will strain it within two decades. Four scenarios are costed on identical assumptions, and the model and its data sources are printed in full so a reader can redo the arithmetic. Mongolia runs a pay-as-you-go pension system into a demographic transition that will strain it within two decades. Four scenarios are costed on identical assumptions, and the model and its data sources are printed in full so a reader can redo the arithmetic.
